Professional Summary

Full Stack Developer and Product Lead with Total 1.5+ year of hands-on experience designing, building, and deploying scalable, real-time SaaS products from scratch. Built **YSDesk** — a live production customer support platform used by real businesses worldwide. Experienced with **React.js, Next.js, NestJS, TypeScript, AWS**, React Native mobile development (Android & iOS), cloud infrastructure (AWS EC2, RDS, S3, ElastiCache, CloudFront), and database optimization (PostgreSQL, MongoDB, Redis). Passionate about clean architecture, high-performance systems, and building user-focused products that solve real-world problems.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, Responsive UI/UX Design, Component Architecture

Backend: NestJS, Node.js, REST APIs, WebSockets (Socket.io), Microservices, JWT Authentication, Auth0/OAuth2, Webhook Development & Integration, Deep Linking

Mobile: React Native, Expo, Push Notifications, Android & iOS Deployment, App Store & Play Store Publishing

Databases: PostgreSQL, MongoDB, Redis, Prisma ORM, Database Design, Query Optimization, Indexing

Cloud (AWS): EC2, S3, RDS, CloudFront, ElastiCache, Elastic Beanstalk, Amplify, VPC, IAM, CloudWatch, SES

Performance & Testing: Load Testing (k6), Performance Optimization, Scalability Testing, API Testing

AI/ML(Academic Projects): TensorFlow, OpenCV, YOLOv5, Python, AI-integrated full-stack systems

Tools & DevOps: Git, GitHub, Vercel, Postman, DNS Management, CI/CD basics

Methodologies: Agile, REST Architecture, Microservices, CI/CD, Code Review, Git Workflow

Work Experience

Junior Full Stack Developer & Product Lead

Jan 2025 – Present

YS Innovations, Coimbatore, Tamil Nadu

Key Achievement: Built YSDesk from scratch as Product Lead — a live SaaS customer support platform used by real businesses, deployed on production AWS infrastructure.

- Led product development of **YSDesk** (ysdesk.com) end-to-end from scratch as **Product Lead** — a real-time live chat SaaS platform for businesses, built using WebSockets (Socket.io), NestJS, Redis pub/sub, and React.js with **sub-100ms message latency**.
- Architected and deployed **full production infrastructure** on AWS (EC2, RDS, S3, CloudFront, ElastiCache, SES, Auth0) for YSDesk; implemented Redis caching that reduced database load by **~40%** on high-traffic endpoints.
- Designed and optimized **RESTful APIs** with NestJS and Prisma ORM on PostgreSQL; applied indexing and query optimization strategies, reducing average API response time by **~35%**.
- Developed scalable **React.js and Next.js** frontend modules with Tailwind CSS, delivering fully responsive, accessible UIs across web and mobile breakpoints.
- Implemented secure **JWT + Auth0 authentication** with refresh token rotation, role-based route guards, and session management across microservice boundaries.

Key Projects

YSDesk — Live Customer Support SaaS Platform

ysdesk.com

Role: Product Lead (Built from scratch)

Stack: React.js, NestJS, Socket.io, PostgreSQL, Prisma, Redis, AWS EC2/RDS/ElastiCache/CloudFront, JWT, Auth0

- Built complete SaaS platform from scratch as sole product lead — real-time live chat system for businesses, achieving organic growth through word-of-mouth without paid advertising.
- Implemented **WebSocket rooms with Redis pub/sub** for concurrent multi-agent sessions with sub-100ms message latency;
- Built **role-based dashboards** (admin, agent, customer) with live ticket tracking, session management, and audit logging; integrated Auth0 for enterprise-grade authentication.

HireZ — Full-Stack Property Rental Marketplace

Role: Full Stack Developer (React Native)

Stack: Next.js, NestJS, React Native, Expo, PostgreSQL, Prisma ORM, AWS, Tailwind CSS

- Led **React Native mobile app development** — built and deployed full iOS & Android app to App Store and Play Store with push notifications, real-time availability, and property search.

- Built **admin web portal** for property management, user management, and analytics dashboard.
- Developed geolocation-based property search, S3 image uploads; achieved **Lighthouse performance score 90+** via Next.js SSR and CDN optimization.

Micro-Finance Operations Platform

Role: Full Stack Developer (Built entirely from scratch)
Stack: Next.js, NestJS, PostgreSQL, Prisma ORM

- **Designed and built the entire application from scratch** — automated full loan lifecycle (KYC onboarding, disbursement, EMI tracking, overdue alerts), reducing manual processing time by **~60%**.

TrackVisionAI — Real-Time AI Object Tracking System GitHub
Stack: Python, TensorFlow, OpenCV

- Built real-time AI object detection pipeline with TensorFlow and OpenCV processing live video at **24 fps**; delivered mobile monitoring interface via React Native with push notifications.

Road Safety Detection System GitHub
Stack: Python, YOLOv5, OpenCV, REST API

- Designed AI-based road violation detection system achieving **~88% detection accuracy**; automated alert generation and reporting via REST API.

Education

B.Tech in Artificial Intelligence & Data Science	<i>2021 – 2025</i>	
<i>Excel Engineering College, Namakkal</i>	CGPA: 7.24 / 10	
Higher Secondary — Computer Science	<i>2019 – 2021</i>	Score: 80%
SSLC	<i>2018 – 2019</i>	Score: 74%

Certifications & Achievements

- AI/ML for Geodata Analysis — IIRSE / ISRO (Aug 2024)
- Cloud Computing — NPTEL (Nov 2023)
- Agile Testing, Methodology & Project Management — NPTEL (Nov 2022)
- Cloud Foundations — Great Learning (Jan 2023)
- Introduction to MongoDB — MongoDB University (Jul 2024)
- Industry 4.0 & Industrial Internet of Things (IoT) — NPTEL (May 2024)
- Power BI for Beginners — Simplilearn (Dec 2024)
- NCC B & C Certificate — National Cadet Corps
